Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Response to Amendment

The examiner is in receipt of applicant's response to office action mailed 5/25/2005, which was received 8/28/2006. Acknowledgement is made to the amendment to the specification, which has overcome the USC 112 rejection, and the amendment to claims 1,8, leaving claims 1,2,4-9 as pending in the instant application. Applicant's remarks and amendments have been carefully considered and were found to be persuasive, however, after further searching a new grounds of rejection is provided below:

Priority

The later-filed application must be an application for a patent for an invention, which is also disclosed, in the prior application (the parent or original nonprovisional application or provisional application). The disclosure of the invention in the parent application and in the later-filed application must be sufficient to comply with the requirements of the first paragraph of 35 U.S.C. 112. See *Transco Products, Inc. v. Performance Contracting, Inc.*, 38 F.3d 551, 32 USPQ2d 1077 (Fed. Cir. 1994).

The disclosure of the prior-filed application, Application No. 60/138,509, fails to provide adequate support or enablement in the manner provided by the first paragraph of 35 U.S.C. 112 for one or more claims of this application. In this case the provisional application does not provided support for bidding in "spot markets" as described in the claims and specification pages 18 and 19 with particular attention to the feature

Art Unit: 3625

preventing the requester from accepting the identical response after the session is terminated.

Claim Rejections - 35 USC § 112

Claims 1 and 8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Although there is support for a buyer's session being terminated, there is not support for limiting this termination to the buyer (specification page 19, lines 11-14).

Examiner's Note

Examiner has cited particular columns and line numbers or figures in the references as applied to the claims below for the convenience of the applicant. Although the specified citations are representative of the teachings in the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant, in preparing the responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,2,4-9 rejected under 35 U.S.C. 102(e) as being anticipated by Shoham et al (6,584,451).

In regards to claims 1,2,4-9, Shoham teaches all the features of the instant claims. For instance, Shoham discloses saving pricing schedules to a database for a third party to provide responses to RFQs (col 5, lines 15-65, Fig 1), receiving a request after the schedules have been saved in the database (FIG 4), preventing a requester from accepting the identified response after the session is terminated by the requester (col 6, lines 1-8, since the buyer needs to be committed (in session) in order to maintain the current schedule, withdrawing or terminating the session would result in the buyer being subject to a new schedule if they decide to enter a new session) and preventing a service provider from modifying the set of responses during the session (col 6, lines 1-8).

In regards to claims 1,2,4-9, Shoham discloses a method and system according to claim 1,8 and 9 as indicated supra. Shoham does not expressly disclose the purchasing of telecommunication services. Shoham does disclose online sales useful

Art Unit: 3625

for a plurality of generic goods and services (Shoham: abstract). The differences, not including telecommunication services explicitly is only found in the non-functional data stored. Data identifying a product useful to a particular business is not functionally related to the substrate of the invention. Thus, this descriptive material will not distinguish the claimed invention from the prior art in terms of patentability, see Cf. In re Gulack, 703 F.2d 1381, 1385, 217 USPQ 401, 404 (Fed. Cir. 1983); In re Lowry, 32 F.3d 1579, 32 USPQ2d 1031 (Fed. Cir. 1994).

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to store any data in the fields of the invention as shown in Shoham, because such data does not functionally relate to the substrate of the invention and merely labeling the data differently from that in the prior art would have been obvious matter of design choice. See In re Kuhle, 526 F.2d 553, 555, 188 USPQ 7, 9 (CCPA 1975).

Response to Arguments

Applicant's arguments with respect to claims 1,2,4-9 have been considered but are moot in view of the new ground(s) of rejection.
